

## **Chemical Peels**

Using specific chemical acids will in minutes, lift away dead cells and trigger a lovely chain reaction. As that top most layer is shed, signals are sent to the living cells below to multiply and move up, to increase collagen production and enhance the hyaluronic acid to act younger and produce more. Different acid combinations are used to address different skin conditions or concerns.

### Glow peel:

Is a combination of lactic acid, salicylic acid, and resorcinol which creates a multipurpose resurfacing solution which is AMAZING for minimizing the appearance of fine lines, pores, wrinkles and hyper-pigmentation issues like age spots, discolouration, and uneven skin tone. It is suitable for all skin types.

### AHA Duo Peel:

Is anti-aging peel which is a combination of resurfacing peel of 20% lactic acid and 10% glycolic acid is used to decrease the visible signs of aging and hyperpigmentation. It is suitable for all stages of aging skin.

### BHA 20 Peel:

Detox Clear Peel that contains salicylic acid and lactic acid for excellent pore penetration and exfoliation. Salicylic acid penetrates into the pore and exfoliates dead skin cells and excess sebum. Lactic acid exfoliates dead skin cells and hydrates. Eucalyptus provides strong astringent properties. This is suitable for acne and oily skin.
