

Facial Lymphatic Drainage

This a procedure done as a part of some signature facials or before microneedling, where suction cups are used in specific technique and direction to promotes increased blood circulation, which may help relieve muscle tension, promote cell repair, and aid in reducing puffiness, minimizing lines and wrinkles, toning your chin and jaw line, stimulating collagen production and enhancing the absorption of products into skin.

It is recommended not to wash your face immediately after cupping. Keep your face covered from sun exposure and heat and avoid alcohol. You may experience flu-like symptoms the next day, do not panic! that is absolutely normal. It is recommended to do facial cupping lymphatic draining two or three times a week for optimal results.
