

## **AK Signature Facial**

AK signature facial uses high end medicated skin care products and techniques, distinguishing it from a traditional or standard facial. Signature facials are tailored to treat clients specific skin type and concerns. It can be done individually or with other skin care offerings.

The aesthetician will thoroughly cleanse your skin to remove all the excess oils, dirt, grease, grime and make-up, then analyze your skin to figure out what products will work best with your skin type during the session. She will then work on toning and exfoliating your skin, followed by a very relaxing facial massage. The application of customized medicated facial mask will help rejuvenate your skin. You will also be treated with layers of special moisturizers, serums, eye cream and SPF to ensure your skin is properly hydrated and protected. During the session, use of selective devices maybe suggested by the aesthetician for a boosted outcome.

AK eye contour care will also be done which includes a variety of skin care steps that treats the delicate and fragile eye contour for better resistance and lasting fatigue-reducing effects. Wrinkles are smoothed, creating a lifting effect. Dark circles and under-eye bags are minimized.

The aesthetician will then recommend specific products or further treatments that will help your skin continue looking great. Some of the AK Signature benefits are Anti-aging, Glow & Brightening, deep cleansed skin, improved blood circulation, getting an expert's advise and above all moments of relaxation at AK Care.
